

BROW & LASH BAR

BROW TATTOO AFTER CARE INSTRUCTIONS

Proper care following your procedure is necessary to achieve the best results. Keep in mind that in many cases, some unevenness of colour is to be expected. This is the purpose of the re-touch (perfecting visit) 4-6 weeks after your initial appointment.

Remember, the initial colour will be stronger and more sharply defined immediately after treatment but as the healing process occurs the colour will soften and lighten.

Trust the process

Your brows should start the healing process straight after your treatment is finished, any redness, swelling and tenderness should subside soon after. If any of these get worse, please seek medical attention. If during the healing process you have any questions or concerns, please contact me.
